

Fixing 404 Error on natures-way-soil.vercel.app

The Problem

Your website deployed but shows 404 - this usually means environment variables are missing in Vercel.

Quick Fix Steps:

Step 1: Check Vercel Dashboard

1. Go to vercel.com/dashboard (<https://vercel.com/dashboard>)
2. Click on your “natures-way-soil” project
3. Go to “Settings” → “Environment Variables”
4. Check if you have ANY environment variables added

Step 2: Add ALL Environment Variables

You MUST add these exact variables in Vercel (copy/paste each one):

Variable Name: NEXT_PUBLIC_SQUARE_APPLICATION_ID

Value: sq0idp-ZI5oA8nkkuXxNkSKwq13IQ

Variable Name: NEXT_PUBLIC_SQUARE_LOCATION_ID

Value: L2Q46XSB7BACQ

Step 3: Redeploy

1. After adding ALL variables, scroll down in Settings
2. Click “Redeploy” button
3. Wait 2-3 minutes for rebuild

Step 4: Test Again

If Still 404:

Alternative Fix - Redeploy from Terminal:

vercel --prod
```
